Dry Fix

GENERAL

Terreal Dry Fix is a versatile, self adhesive tape, consists of a 0.064mm reinforced aluminum foil backed with a 1.45mm weatherproof self adhesive compound which is protected by a silicone release film.

ADVANTAGES

- Fast and easy application.
- Adheres on most construction materials including clay, asphalt, brickwork, cement, marble, ceramics etc.
- Adheres to the substrate and to itself, eliminating the problems of wind lifting and wind driven water.
- The metal surface received a special treatment allowing them to be easily painted to match other colours.
- In case of little punching and nailing, the membrane's special compound immediately seals around nails and waterproofs silts and tears.

APPLICATION

The surface on which Terreal Dry Fix is to be applied must be smooth and free of irregularities. Damaged and dirty or dusty surfaces must be repaired and cleaned before application.

To obtain the best results, users are advised to:

Step 1

Cut the tiles along the hip tree with a gap about 5mm.

Step 2

Choose a matching metal finishing colour and unroll the required length.

Step 3

Remove the release film and place in position.

Step 4

Press to the profile of the tiles and make sure all gaps are sealed.

Step 5

Fix the hip tiles in place and nail to the hip tree. Make sure the membrane is not exposed and hidden under the hip tiles.

If an overlapping is required, a minimum of 50mm of Terreal Dry Fix should be used.

COLOUR AVAILABLE

Lead

Terracotta

Dark Red

SIZE

Per roll of 30cm width X 10m length
